

About Department:

Commerce department has been functioning since 1966 to produce young and dynamic graduates emanated from rural background. Even though to get through the examination is a primary motto, to understand the business and management environment of the country at large is also put as another goal before the students. Our experienced lectures having enormous research zeal have been attending State, National and International seminars in regular intervals. The department lecturers have been refreshing their subject knowledge by attending ‘refresher courses’, and ‘work-shops’ as and when they get opportunities.
