

The programme outcomes of the computer science students after completion of their graduation,

Computer Science

- ✚ An ability to apply knowledge of computing and mathematics appropriate to the discipline.
- ✚ An ability to identify, formulate, and develop solutions to computational challenges.
- ✚ An ability to function effectively on teams to accomplish shared computing design, evaluation, or implementation goals.
- ✚ An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computational systems.
- ✚ An ability to develop solutions to the complex problems in the field of Information Technology.

M.Sc.(Computer Science)

- ✚ Ability to understand the general principles of Computer Science
- ✚ Ability to develop own programming skills and computer applications
- ✚ Ability to provide up to date technologies, methodologies for the advance career prospects
- ✚ Ability to develop in professional, ethical, moral and social responsibilities
- ✚ Ability to communicate effectively
- ✚ Develop the Intellectual Skills for effectively problem solving
- ✚ Ability to design, analyze, implement the candidate system
